Education

Oklahoma City University — Oklahoma City, OK
Master's in Computer Science, GPA: 3.97 — *Aug. 2024 – Dec. 2025*

Northeastern State University — Tahlequah, OK
Bachelor of Science in Computer Science (Summa Cum Laude) — *Aug. 2020 – May 2023*

Experience

Full Stack Developer — Apr. 2026 – Present
Paul Logistic — *Tulsa, OK*

- Built automation pipelines with Python and Selenium to handle freight booking and dispatch workflows, eliminating manual load entry and increasing daily freight throughput by 35%.
- Designed serverless integrations with AWS Lambda behind API Gateway, giving outside vendors and carriers secure endpoints to tender loads and push status updates directly into the system instead of by phone and email.
- Developed internal tooling and data visualization dashboards for the pricing analyst team using React, Node.js, and PostgreSQL, replacing manual spreadsheet reporting with real-time lane rate and margin views.
- Provisioned and maintained AWS infrastructure (EC2, Lambda, API Gateway) as code, standardizing dev and production environments and reducing deployment time by 50%.

Software Development Intern — Jan. 2025 – Dec. 2025
American Fidelity — *Oklahoma City, OK*

- Assisted in the full-stack development of the American Fidelity internal application, optimizing performance and improving production efficiency, reducing page load time.
- Designed and implemented new features, models, and responsive UI components using C#, .NET, Angular, Bootstrap 5, HTML, and SASS, enhancing user experience and increasing accessibility by 20%.
- Collaborated with QA and development teams to test, refine, and deploy updates across multiple environments using Octopus Deploy, reducing deployment errors by 10% and improving release efficiency.

Web Developer — June 2023 – May 2024
Tranquility Nail and Spa — *Tulsa, OK*

- Developed a customer feedback app with a team member using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling efficient customer-employee communication.
- Built the React.js front end and integrated Node.js and Express.js APIs for user authentication and feedback management, enhancing customer satisfaction by 20% through streamlined feedback loops.
- Implemented manager-employee communication features, leading to a 15% improvement in employee performance and customer retention.

Projects

Schedulo | *React, Node, Express, MongoDB* — **Live Demo**

- Built and deployed a full-stack booking management system, handling over 200 booking requests per day, streamlining appointment scheduling and resource allocation for both customers and staff.
- Designed responsive UI and real-time email notifications, reducing no-shows by 30% and increasing booking efficiency by 25%.
- Developed AI-powered caption generation and Facebook auto-posting features, increasing weekly social media engagement by 40%.

VidSummarizer | *Python, LangChain, Flask, HTML, JavaScript, CSS* — **Source Code**

- Developed an AI-driven application that converts YouTube video content into concise summaries using OpenAI GPT models, LangChain, Python, and Flask with CORS-secured endpoints.

Technical Skills

Languages: Python, C/C++, SQL (PostgreSQL), JavaScript, TypeScript, HTML/CSS, C# (ASP.NET Core)
Frameworks & Libraries: React, Angular, Node.js, Express, Blazor, Flask, Selenium
Cloud & DevOps: AWS (EC2, Lambda, API Gateway), Azure, Infrastructure as Code, Docker, CI/CD, Octopus Deploy, Git
Databases & Tools: PostgreSQL, MongoDB, SQL Server, REST APIs, ServiceNow, Visual Studio, VS Code, PyCharm
